MEMO FOR CASE FILE - 15 July 1958, Xenia, Ohio

SUBJECT: Telephone Interview of Source - Mrs. [REDACTED]

1. After two days of attempting to contact this person, reached at 10:30 A.M. this date.

2. After explaining that we cannot do much with only a report of some lights seen in the general vicinity of Xenia, without specific information as to direction, bearings, locations, altitudes, etc., Mrs. [REDACTED] gave the following additional data:

a. Object in sight from about 4:30 to 5:30 A.M.

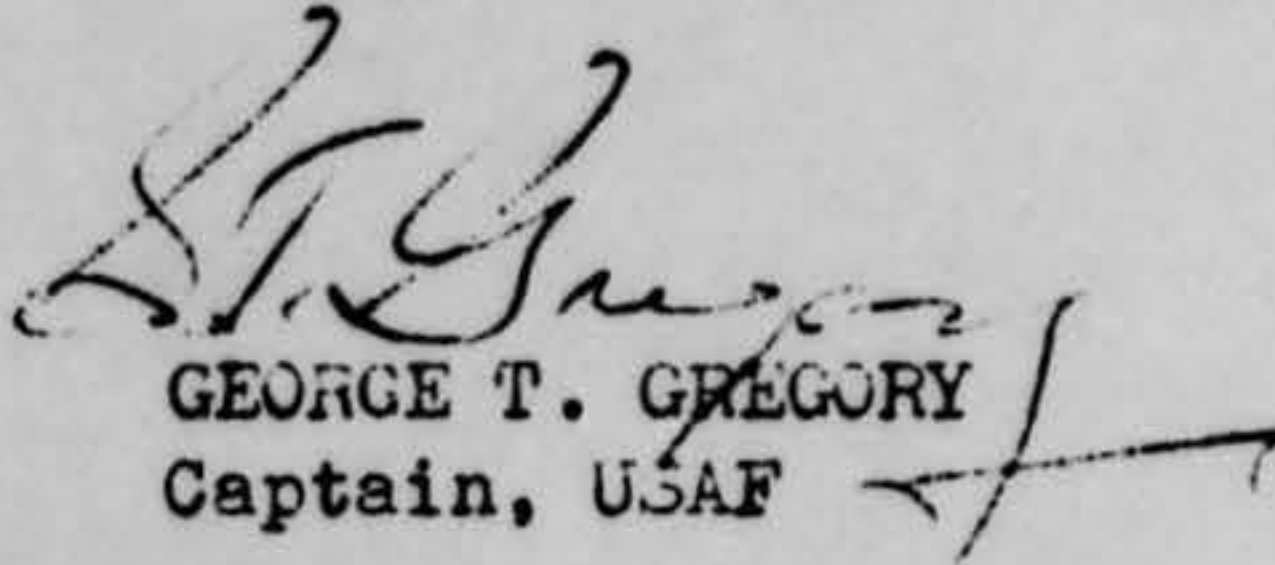

b. Was not sure of direction but believed to be East Northeast. (Astro computers and tables show Venus rising out of the Northeast (LHA 93 degrees)) at that time. WX conditions such that it appeared highly magnified.

c. Object looked like a very bright star - often appeared as three lights.

d. There were clouds in the area during the last half of the sighting and light faded out when clouds moved in front of it.

3. She asked if anyone else reported it. Replied that nothing unusual reported by local radar, flights in the air (B-47), COC or other persons.

4. Checks and analysis: As object was reported in same position for one hour - Astro check made. See Par. 2 b. above. *Venus only*

Name of person interviewed
for more info

At 0420 hrs. this date I was in the [redacted] P.
[redacted] and said somebody had reported
3 lights in the vicinity of Xena, Ohio. (by use of binoculars?)
He also said that a 27 [redacted] could have been in
that vicinity at the time, and the objects could
have possibly been the landing lights.

Where was observer located when
he saw the object?
What was the direction, bearing,
elevation of object?

At 0435 hrs. Jones called about the same
report. And gave the name of a [redacted]
of Bellbrook, Ohio, phone [redacted] as the
reporter.

Call tomorrow

Insult Info.
(although probably correct)

What was he doing out at 4:30 in the morning
with a pair of binoculars

Nothing has to do with
a light [redacted] can
somebody [redacted] between 4:20
[redacted]?
